

2.3. 1997год — "have a little more grown up".

In 1997 in June there came group of Americans of Kentucky for 10 days. They also have brought the mite and have executed a number of works: a laying of internal partitions, pouring by concrete of internal designs. This group also has rather fruitfully worked and has brought the contribution to a spiritual life of church. Under the direction of Steve many lessons at Sunday school have been spent. Brother Garry Wilson visited families of believers. It has spent a number of lectures to churches. Have visited with the program the school №1.

The desire was to visit and other schools, but have received an interdiction. This group on apartments at believers lived, and it has even more strongly pull together all of us. In a word, it was a pity to leave them, dialogue with this group was rather close, and parting was very sad. In second half of October there have arrived brothers from Ukraine. They had been executed a laying from a mark of 3.00 metres to a mark of 4.80 metres.
