

2.5 1999 year - a long-awaited roof.

Works this year aspired to begin, as soon as possible, as all would like to finish a roof necessarily. The roof was extremely necessary, as serious destructions of the bases of walls because of an atmospheric precipitation were outlined. The architect of a city last year insisted on that we have built at least a temporary canopy.

From the beginning of May the laying of forward and back pediments was carried out by brother Nicolay from Ukraine. Simultaneously with it searched for a brigade which could make assemblage of farms. After long searches this work have incurred Gennady Gorbunov and Alexander Gavriljuk. Boards should be taken away in V.Volochok, and then to bring details of farms. After that Gennady and Alexander, daily coming, collected by means of our brothers of a farm. In the end of August assemblage, and installation of farms have been finished. In July group of brothers of Ukrainians have executed a laying round the operating house of a prayer for the purpose of expansion and house warming. In the beginning of September the same brothers have arrived and have continued a laying of arches over windows and doors (the under construction house of a prayer). After that were engaged roofs, then have covered with its metal.

Ukrainians have left. Work on building was continued by brother Andrey Malyhin, Igor Kudryashov and some more brothers. Organizational questions brother Aram Oganisjan still carried out. Other brothers are much more rare, as required helped. Till the end of this year gradually brought and inserted window frames, doors. Painted frames, doors, inserted glasses. Have made also missing benches for church. Boarded a ceiling.
