

On April, 9th the fellowship of married couples took place.

Its theme was: "Marriage - as romantic travel". Unfortunately, there are so many cares in our life that we have no time on romanticism. But God, having created marriage institute, wishes, that marriage can give pleasure both to the man and the woman.

The leader of dialogue Igor Kudryashov offered various themes for discussions. Brothers and sisters - husbands and wives - actively took part. Some shared the life experience, there were also couples which are in marriage less than year. It was interesting to all people.

On fellowship there were also our visitors - married couples from Vyshniy Volochok. Many songs with participation of Vyshnevolotsky musical group "Field" sounded.

It has been revealed that romanticism doesn't depend on age. It should be present at each family. It is pledge of strong and happy home life.

Fellowship of married couples
